Zarina Panfilova

Junior Software Engineer at EPAM Systems

Караганда, Карагандинская область, Казахстан

Общие сведения

I started my IT path as a Junior Software Testing Engineer.

After working in this role for 1 year, I moved to Systems Engineering.

I was working in the role of Support Engineer for 2.5 years.

As I was not the only person who was responsible for the support process in the project, I helped with additional activities that were critical for the project but usually out of the support scope. I performed front-end tasks with pleasure, as I'm interested in front-end development.

I passed several online courses by myself and 2 mentorship courses. And finally I'm working in a role of Frontend Engineer.

My responsibilities were:

- Development of interfaces using JavaScript
- Project support (development, refactoring, bug fix, hot fix)
- Developing new components and maintaining existing code

Опыт работы

EPAM Systems

Junior Software Engineer

октября 2020 - Present (2 года 9 месяцев)

Kazakhstan

EPAM Systems

3 года 9 месяцев
